

QUARTERLY REPORT

For the period ended 30 September
2018

- + Carpentaria Resources is answering the world's call for high grade iron ore.
- + The Company has a majority interest in the Hawsons Iron Project, source of Hawsons Supergrade® product, the world's best iron ore product.

HIGHLIGHTS

Hawsons Iron Project

- + Transaction with Mitsui & Co., Ltd. significantly reduces the Hawsons Iron Project's funding risk, as the Japanese trading house secures off-take from the project in a 2 stage financing package.
- + Mitsui obtains an option to secure off-take by contributing A\$5.4m to Hawsons bankable feasibility study (BFS).
- + Mitsui if it exercises the option by contributing US\$60 million to Hawsons construction funding will secure 2 million tonnes per annum of Hawsons Supergrade® product off-take for 20 years.
- + Company carries out a two week marketing campaign in Asia with very encouraging responses on investment interest, product demand and long term high quality iron ore pellet feed market direction, which all support the development case for Hawsons.
- + Company continues to negotiate BFS funding with multiple parties and is considering a mix of various funding methods focussed on delivering value for shareholders.
- + Carpentaria and its counterparties have agreed to work towards and within certain timeframes for BFS funding. (There is no guarantee of a transaction).
- + Hawsons Iron Project development has been assessed as **not** a controlled action under the *Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act)*. This means that the mine and infrastructure development in NSW does not require further assessment and approval under the EPBC Act.
- + Ecology surveys and other environmental impact study being continued at Hawsons.
- + CAP project stake increases to 68.7%, following year-end dilution calculation

Corporate

- + The Company's annual general meeting is scheduled for Monday 15 October 2018, and shareholders are encouraged to vote.

HAWSONS IRON PROJECT

70%

Iron percentage of Hawsons Supergrade® product.

14.0

Offtake demand for Hawsons Supergrade® product (Mtpa).

201

Total product of Hawsons Iron Project (million tonnes).

Carpentaria Resources Limited (ASX:CAP) announced today its quarterly activities and cashflow report for the period ending 30 September 2018.

The Company continues to be focussed on developing its flagship Hawsons Iron Project near Broken Hill, NSW.

In August 2018, the Company and its Hawsons Joint Venture partner Pure Metals Pty Ltd entered into an agreement with the giant Japanese trading house, Mitsui & Co., Ltd. Under the agreement, Mitsui will contribute A\$5.4 million towards the cost of the project's bankable feasibility study (BFS) for an option over 2 Mtpa of Hawsons Supergrade® product off-take. This off-take will be secured by Mitsui subject to Mitsui's option exercise with a US\$60 million contribution to the debt funding package for the construction of the Hawsons Project (refer ASX Announcement 6 August 2018).

Building upon the improved project development potential generated by the Mitsui transaction, the Company during the quarter completed a two-week marketing campaign with trading houses and end users to progress and initiate BFS and construction investment negotiations.

The Company is encouraged by the good progress of a number of BFS funding negotiations, and the counter parties have agreed to work towards and within certain timeframes. The Company is considering a mix of various funding methods designed to deliver shareholder value, including non-dilutive investment similar to the Mitsui agreement. (There is no guarantee of a transaction).

The customer feedback supported current market analysis. That is, a transformation in the iron ore market has taken place whereby greater premiums are paid by end users for higher quality products and greater discounts are applied for lower quality products. This means that Hawsons Supergrade® product continues to be highly sought after by end users and supports the development of the project. Significantly, iron ore pellets are the highest growth section of the iron ore market.

Following the submission by the Company of a referral under the *Environment Protection and Biodiversity Conservation Act 1999 (Commonwealth)* (EPBC Act) Carpentaria was advised by the Commonwealth Government that the proposed action to develop the Hawsons Iron Project open cut magnetite mine 60 kilometres south-west of Broken Hill and related infrastructure within NSW is not a controlled action. This is very significant, as it means that the proposed action does not require further assessment and approval under the EPBC Act before it can proceed.

During the quarter, work at Hawsons included cultural heritage and other stakeholder consultation and ecology survey work for the purposes of the project's environmental impact study.

About Hawsons Iron Project

The Hawsons Iron Project joint venture (CAP 68.7%, Pure Metals P/L 31.3%) is currently undertaking development studies based on the low cost, long term supply of a high grade, ultra-low impurity iron concentrate to a growing premium iron market, including the direct reduction (DR) market.

The project has a clear technical and permitting pathway. It is located 60km south-west of Broken Hill, an ideal position for mining operations with existing power, rail and port infrastructure available for a 10 Mtpa start-up operation. A mining lease application has been lodged.

The project's soft rock is different from traditional hard rock magnetite and allows a very different approach to the typical magnetite mining and processing challenges (both technical and cost-related). The soft rock enables simple liberation of a product of rare quality without complex and expensive processing methods.

The Company is targeting the growing premium high-grade product market, both pellets and pellet feed, which is separate to the bulk fines market and its prefeasibility study has shown its targeted cost structure is very profitable at consensus long-term price forecasts for this sector. It has secured off-take related funding from Mitsui and off-take intent from blue chip companies Formosa Plastics, Bahrain Steel, Shagang Steel, Emirates Steel, Kuwait Steel, Mitsubishi Corporation RtM Japan and trading house Gunvor Group.
